Best Poster Prize

Attendees of the 13-th National Conference of Biophysics (CNB 2015) are invited to participate at the Best Poster Prize competition!

A poster is eligible for this competition if it includes at least one coauthor who is a young scientist (undergraduate student, master's student, or PhD student), and the work is presented during the poster session, in the presence of the Prize Committee, by a young scientist.

The Prize Committee will include experienced researchers from abroad, as well as from several Romanian laboratories.

Based on the quality of the research, the appearance of the poster, and the clarity of the presentation, the Prize Committee might decide to offer up to three prizes in the Best Poster Prize competition (1st Place, 2nd Place, and 3rd Place).
